

Jackson Clark

Lubbock, TX 79423 | 806-316-3942 | jacksonw.clark@ttu.edu | <https://www.linkedin.com/in/clarkjackson>

EDUCATION

Texas Tech University

GPA: 3.94

Bachelor of Science in Computer Science, Minor in Mathematics

Expected May 2027

- **Involvement:** Google Developer Student Club, CodePath, Get Excited About Robotics
- **Relevant Coursework:** Data Structures, Computer Organization & Assembly Language, Modern Digital System Design, Programming Principles, Linear Algebra

EXPERIENCE

Texas Tech University

Sept. 2025 – Present

Student Assistant – Support and Information Center

Lubbock, TX

- Provide first-line IT support through the university's ticketing system, logging and resolving technical issues for students, faculty, and staff.
- Troubleshoot software, hardware, and networking problems in computer labs and offices, escalating complex issues when necessary.
- Assist with system setup, account access requests, and resource management to improve efficiency of campus IT services.

Double Seven Wealth Group

Aug. 2025 – Present

Full Stack Engineer

Amarillo, TX

- Engineering a full-stack, responsive website for a financial services company using Next.js, improving performance and SEO.
- Developing user-centric features tailored for finance, such as a secure contact form for lead generation and interactive charts to display market data.
- Crafting a modern and accessible user interface with Tailwind CSS, focusing on a design that builds client trust and enhances user engagement.

Paradigm Technologies

May 2023 – July 2023

Intern

Amarillo, TX

- Delivered technical support services and configured computer systems for clients.
- Troubleshot hardware/software issues and resolved user-reported problems.
- Managed Remote Monitoring and Management (RMM) software, Ninja, to streamline client systems.

OTHER EXPERIENCE

HTeaO

Sep. 2023 – Aug 2024

Team Lead

Amarillo, TX

First Baptist Church

Sep. 2021 – Sep. 2023

Family Life Center Assistant

Amarillo, TX

PROJECTS

MapMyHealth | *Next.js, TypeScript, React, TailwindCSS, Mastra, Mermaid*

Sept. 2025

- Designed an AI-powered healthcare assistant that analyzes patient symptoms using a custom Bayesian-inspired predictor engine to estimate potential conditions and recommended actions.
- Integrated a conversational AI agent powered by Google Gemini and Mastra that interacts with patients, records health data, and recommends treatments or urgent care when needed.
- Created a dynamic health map visualization using Mermaid diagrams, allowing patients to explore treatment paths, estimated diagnoses, and cost transparency in real time.

Instrument Calibration Project | *Pandas, Scikit-Learn, Matplotlib*

Dec. 2024

- Applied regression models using Scikit-Learn to predict compressive strength of concrete based on its composition.
- Leveraged Matplotlib to visualize data trends and model performance for enhanced interpretability.
- Built an automated Python interface to input new concrete mix data and update strength predictions in real time.

TECHNICAL SKILLS

Languages: Python, C, C++, Swift, JavaScript, TypeScript, Lua, HTML, CSS, SQL, Assembly

Frameworks & Libraries: React, Next.js, Tailwind CSS, Pandas, NumPy, Matplotlib, Scikit-Learn, Pygame

Developer Tools: Git, GitHub, VS Code, Vim, AWS

Hardware: PC Building & Troubleshooting, Homelab, Breadboarding, Microcontroller Programming, Verilog

Operating Systems: macOS, Linux, Windows
